

TELESCRIPT

SPEAKER TELEPROMPTING SYSTEMS for audience facing events

Why do public speakers choose Telescript for their presentations? It's simple. Our prompters don't let them down. Reliability is engineered into Telescript prompting systems. Whether using a lightweight flat panel system or our conventional CRT monitors the message they deliver will be in exactly the words they wish to use. Words are read from inconspicuous semi-reflective glass panels, creating the impression that speakers are looking directly at the audience. You can concentrate on the style and quality of your delivery by using Telescript. The words are there, before your eyes, just as you need them.

The heart of Telescripts Public Speaker system is Telescripts software. Our systems are available for a variety of platforms: Windows 95/98, ME, NT, 2000 and XP, and MS-DOS, and only Telescript offers world language support in one version of the software.

Back-up. For those who require back-up, we offer an optional dual serial controller allowing two computers to be scrolled simultaneously and in sync. If power is lost to one computer, your back-up can take over without any delay.

OUR Prompting software couldn't be more user friendly - you don't even need a manual.

So, if you want worry free prompting for hire or purchase - call us for a quotation

'Get it right first time'
